ENGLISH

USER LEVEL

Patrol Officers to SWAT

TACTICAL PHASE

Direct Threat, Indirect Threat & Evacuation Care

The Tac Med Drop Leg IFAK Pouch was designed specifically for Los Angeles Police Department (LAPD). The pouch provides the law enforcement officer with maximum flexibility without compromising the ability to provide on target care. This pouch is worn on the leg and attaches directly to the officers belt or to a tourniquet pouch worn on the belt. When worn with the tourniquet pouch, the detachable lower portion of the IFAK provides for additional medical capabilities if the situation dictates, while having the tourniquet available for instant access on the officers belt. This pouch is offered stocked based on different levels of medical capabilities. All kits can also be custom packed to meet your specific mission requirements.

FEATURES

- A** Quick Release Buckle & Leg Strap

THE LA KIT

THE LA KIT

TMS bags are made 1000D Cordura Nylon material, specifically chosen for its resistance to abrasion, extreme arid conditions, and ultra violet degradation. Seams are reinforced with double stitching, using high-strength military-grade thread for maximal durability, in addition to YKK zippers. All TMS items are made to meet US Department of Defense standards and are certified under ISO 9001, 13485 and CE where applicable. Finally, they are fully approved by NATO and used by major militaries, law enforcement and emergency response organizations within the USA and throughout the world.
