Tactical Medical Solutions® is a global leading developer and manufacturer of pre-hospital medical gear for the tactical and civilian world.

We currently have over 2,000 products available and a presence in 70 countries around the world. Here at home, we service 7 of the top 10 police departments, including the NYPD and LAPD, as well as major fire and EMS agencies.

We're proud to say that when customers think of TacMed™, they think uncompromising - uncompromising commitment to delivering top-quality products, tactical knowledge, customized training, and reliability in the field.

# TPAK

PRODUCT NUMBER	TPAK
DIMENSIONS	6" L x 0.5" W x 0.5" D
WEIGHT	0.0625 lbs.

## TPAK FEATURES

- Sterile device
- Needle gauge and length
- Single-use only device
- Lot # on each unit
- Expiration date on each unit

The 14 gauge TPAK chest decompression needle by TyTek Medical is the recommended 3.25" length for treating a tension pneumothorax. You can't count on a standard IV catheter to needle a chest deeply enough in needle thoracostomy. The TPAK comes preassembled to include a catheter placed over the needle. Each unit comes individually packaged in a ruggedized case that ensures the needle/catheter is secure upon deployment, and the capless flash chamber gives instant confirmation of needle placement in pre-hospital needle thoracostomy. The shock resistant case has a textured, easy-open hex cap. The TPAK is not made with natural rubber latex. The shelf life is 7 years from the date of sterilization.

**YOUR EQUIPMENT SHOULD NEVER BE A COMPROMISE.**
