Tactical Medical Solutions® is a global leading developer and manufacturer of pre-hospital medical gear for the tactical and civilian world.

We currently have over 2,000 products available and a presence in 70 countries around the world. Here at home, we service 7 of the top 10 police departments, including the NYPD and LAPD, as well as major fire and EMS agencies.

We're proud to say that when customers think of TacMed™, they think uncompromising - uncompromising commitment to delivering top-quality products, tactical knowledge, customized training, and reliability in the field.

RISE™

(RIGID IMMOBILIZATION SYSTEM FOR EXTREMITIES)

The **RISE™ (Rigid Immobilization System for Extremities)** is designed to be intuitively applied under stress to match the injury present as a straight splint, 90-degree splint, or pelvic binder. It can be easily secured to the patient with items such as an elastic wrap or pressure bandage.

Its innovative design features dynamic living hinges that allow it to collapse into the smallest form factor for maximum portability and kit space savings. The hinges allow you to form-fit to the required shape and dimensions for proper splinting on both upper and lower extremities. Unique to the RISE™, multiple cutout slots provide you the capability to create a pelvic binder when paired windlass or ratcheting tourniquet such as our SOF® Tourniquet.

The one-of-a-kind construction is made of a lightweight polymer capable of withstanding surface cleaning and harsh elements, including saltwater, while maintaining its rigidity and durability, making it an advantageous addition to any IFAK for increased medical capabilities.

YOUR EQUIPMENT SHOULD **NEVER** BE A COMPROMISE.

PRODUCT NUMBER	87-1046
DIMENSIONS	
FOLDED	6.25"W x 4"L x 1"D 16cm W x 10.25cm L x 2.55cm D
OPEN FLAT	32"L x 6.25"W 81.25cm L x 16cm W
WEIGHT	4oz / 113.5g
PATENT PENDING	

FEATURES

- DYNAMIC LIVING HINGES**
Multiple pre-formed folding points for form-fitting to the required shape and dimensions while minimizing size for storage versatility.
- PELVIC BINDER SLOTS**
Unique cutout slots provide you the ability to create a pelvic binder in conjunction with a windlass or ratcheting tourniquet.
- SECURING SNAPS**
Allow you to bend and lock the RISE into place for the 90-degree applications.
- LIGHTWEIGHT POLYMER CONSTRUCTION**
The material maintains its strength and rigidity without fail, even after refolding multiple times.
- COMPACT FOLDING**
The pre-formed folding points allow for compact storage, even smaller when shrink-wrapped, so it can fit into virtually any size IFAK.
- SCREEN PRINTED INSTRUCTIONS**
Instructions for all 3 splinting application styles, printed directly on the surface so you always have them when needed.

ADDITIONAL FEATURES

RADIOLUCENT

The RISE™ (minus the Securing Snaps) will not obstruct X-Rays so it can be left on the patient during hand-off.

BLOOD & CHEMICAL RESISTANT

The polymer construction allows for surface disinfecting before and after use without compromising the splint's integrity.
