4" FLAT PACKED VERSION	<b>7.5"L x 5.5"W x 2"D</b> <b>19cm L x 14cm W x 5cm D</b>

## WEIGHT

**2.7oz / 76.5g**

## US PATENTS

**7,652,190 & 8,163,973 B2**

## FEATURES

- HEMOSTATIC GAUZE**  
Stocked with 3"x12' of ChitoGauze® PRO hemostatic gauze, ideal for a variety of applications and wound surfaces.
- TRUE PRESSURE CUP**  
Generates focused pressure on the wound site to assist occluding damaged vessels. It can also serve as a rigid eye shield for ocular injuries per CoTCCC guidelines.
- WOUND PAD**  
Covers the injury site to assist with sustained bleeding control and keep the wound clear of debris. Its non-adherent compartment keeps gauze tucked neatly inside for rapid access during application.
- VELCRO® CONTROL STRIPS**  
Built into the elastic wrap to prevent accidental unrolling during application.
- ELASTIC WRAP**  
Secures the gauze and wound pad to the injury site and assists in maintaining consistent applied pressure.
- SECURING CLIP**  
Locks the bandage into place to free up the user's hands to treat other injuries or casualties.
- EASY-TEAR POINTS**  
Intuitive, rapid access to the sterile bandage is achieved through multiple tear points indicated by red arrows at each package corner.

The **OLAES® Hemostatic Bandage** combines the globally recognized OLAES® Modular Bandage with battle-tested HemCon® ChitoGauze® PRO, creating the most comprehensive trauma bandage for multiple injury profiles.

One of few CoTCCC recommended hemostatic dressings, ChitoGauze® PRO is X-Ray detectable and the included gauze is located inside the bandage's wound pad for rapid access at the point of injury.

Having both a pressure bandage and hemostatic gauze in a single package streamlines your treatment process and saves space in your kit for additional medical items.

**YOUR EQUIPMENT SHOULD NEVER BE A COMPROMISE.**
